

Ask — save question

ask-save-dialog.html · 700×574

Annotations

- 1 **Private draft** Saved as a private draft (status = draft) that an admin can approve for the team. Opens after you ask a new question and choose which values become reusable inputs.
- 2 **Label vs. full text** label — the short button caption; the full question is stored as the tooltip (canonical_prompt). Short caption shown on the saved button; the full question is kept as its tooltip.
- 3 Mark a value **Parameter** to turn it into a fill-in-the-blank asked each time you reuse this (list values become a drop-down). Mark it **Fixed** to lock it in. One saved button then works for every value.
- 4 Discard changes and close.
- 5 Save this question as a draft.
