Annotations

- 1

Version pill (right-aligned) Dimmed build pill sits on the RIGHT, beside the account menu. Hover reveals the build sha; on phones it folds into the account menu.
- 2

Account menu Avatar + name + chevron open the account menu (profile, settings, sign out). On narrow screens the feedback / bug / dark-mode icons and version pill collapse into here.
- 3

Every privileged action Every privileged action is recorded — who did what, to which entity, when. Nothing here can be edited or deleted; click a row for its full before/after.
- 4

Append-only Entries are append-only. A mistake is corrected by a new correct entry that points here — the original is never edited. The red crossed-out value is the old one; green is the new one.
- 5

Stored payload The raw detail jsonb stored on the audit_log row — the source of truth the before/after view is rendered from.
