

Confirm · reset database

confirm-database.html · 760×520

Annotations

- 1** **Context: wipe the database** The confirm shown by **Database** → **Reset to empty / Reseed from demo** — a whole-database operation, NOT a single-record delete. It empties every **data** table; the schema, install config (.env) and auth accounts are untouched.
- 2** Cancel without making changes.
- 3** Wipe the database to an empty state.
