

Confirm · remove enrollee

confirm-remove-participant.html · 760×460

Annotations

- 1 **Context: soft-withdraw an enrollee** The confirm shown by **Watch drawer** → **Remove from run**. This is a **soft** withdraw, not a delete — it sets `withdrawn_at` and keeps the rounds the enrollee already produced. That's why it's a warning, not a red irreversible-delete guard. This removes the enrollee but keeps the answers they already gave — it isn't a full delete.
- 2 Cancel without removing.
- 3 Remove this enrollee from the run.
