Announcement · to everyone in this study

Heads up — we're aware of a brief glitch and are looking into it. Thanks for your patience.

Broadcast vs 1:1 Announcements are broadcast to everyone in the study; the messages below are a private 1:1 channel with the experimenter.

Can be gated off When the experimenter locks enrollee→experimenter messaging for a study, this composer is disabled — broadcasts (announcements) still arrive, but replies are turned off.
