How do I clear the clutter in my chat window?
- LT** liam_t Beta-Cohort 22m
Will retry later.

Broadcast

3 A side channel to reach enrollees during a run. It is logged for audit but never becomes part of the run's chat data.

Heads up — we're aware of a brief glitch and are looking into it. Thanks for your patience.

When I submitted my prompt, I got a '500 internal server error' in red.

Thanks, Carol — retrying your last message now. One moment.

ok,

Annotations

- Version pill (right-aligned)** Dimmed build pill sits on the RIGHT, beside the account menu. Hover reveals the build sha; on phones it folds into the account menu.
- Account menu** Avatar + name + chevron open the account menu (profile, settings, sign out). On narrow screens the feedback / bug / dark-mode icons and version pill collapse into here.
- Out-of-band channel** Operator↔enrollee messages are a side channel: **logged** for audit but **non-experimental** — they never become part of the run's chat data.
- Send this message to the enrollee.
- Open this person's live chat to watch what they see as they work.
- Re-send this person's last message if it failed with an error.
- Take this person out of the run — you'll be asked to confirm first.
- Send this message to the enrollee.
