Annotations

- 1 **Version pill (right-aligned)** Dimmed build pill sits on the RIGHT, beside the account menu. Hover reveals the build sha; on phones it folds into the account menu.
- 2 **Account menu** Avatar + name + chevron open the account menu (profile, settings, sign out). On narrow screens the feedback / bug / dark-mode icons and version pill collapse into here.
- 3 Shows every experiment running right now and how each person is doing, live.
- 4 The named group of people signed up for this run.
- 5 **Notes persist server-side** Experimenter notes are saved to the shared database, not just this browser. Each save stamps the author + time, so the team sees one live note per run.
- 6 View every response in this run.
- 7 How each person's session is going. 'Stuck' means it hung or errored; 'over-limit' means they hit the time or message cap.
