

Sign in (pre-auth)

sign-in.html · 760×600

The image shows a sign-in interface for 'ChatMaestro'. At the top is the ChatMaestro logo. Below it are four numbered steps (1-4) for social sign-in: 'Sign in to continue', 'Continue with Google', 'Continue with Microsoft', and 'Continue with Apple'. Below these is a section 'OR USE YOUR EMAIL'. It includes an 'Email address' field with the value 'alice@example.com' (step 5), a blue button 'Email me a sign-in code' (step 6), and a 'Check your email' section (step 7) with a message: 'We sent a 6-digit code to **alice@example.com**. Enter it below.' At the bottom are six input boxes for the code, with the first four containing the digits '4', '0', '2', and '9'.

Annotations

- 1 **Auth model** OAuth-first sign-in (Google / Microsoft / Apple) with an email one-time-code fallback — no passwords, no SMS.
- 2 Sign in using your Google account.
- 3 Sign in using your Microsoft account.
- 4 Sign in using your Apple account.
- 5 **Role & ownership** Role is set by the platform, not chosen at sign-in. The Owner account is anchored to a fixed user id, so the Owner's email can change without losing ownership.
- 6 Email a one-time sign-in code.

- 7 **Second step** This step appears after the enrollee requests a code — sign-in is two steps: request a code, then verify it. Both steps are shown together here for the mockup.
-
- 8 Verify the code and sign in.
